NOISE-BAN™ SUPREME

PROCESS

1. Needs Assessment

Our sales representative will discuss your requirements regarding your Hearing Conservation Management Programme and planned implementation.

2. Impressions

Our technicians will visit on-site to take impressions of the selected employees' ears. During the impression taking the technician will:

- Explain the process to the employees
- Inspect the employee's ears
- Take the impressions
- Capture information on a database

3. Manufacturing

- Our laboratory is ISO 9001:2015 accredited
- The lead-time is approximately 4 – 6 weeks once the impressions is received

4. Fitment

The technician will schedule an appointment to fit the Noise-Ban on-site. During the fitment the technician will:

- Do a comfort assessment
- Do a leak-tight seal check
- Training and motivating the user
- Capture information on a database

5. Monitoring

Annual monitoring is done to ensure that the Noise-Ban continues to function effectively in the user's ears. This extends the warranty for another 12 months. Steps taken:

- Assess the use and check the condition of the hearing protection device
- Do a leak-tight seal test
- Check attenuation requirements
- Cleaning of the product
- Replace broken or faulty parts
- Assist and re-train the user in the use and maintenance of the product
